PLANNING FOR ENDING THE EPIDEMIC IN INDIANA

BREAKOUT SESSION 1

10/7/2020

Breakout Groups

- Randomly assigned
- Facilitated discussion guided by framing questions
- Focus on what steps we can take to end the HIV epidemic in Indiana

End the Epidemic: A Plan for Indiana

Diagnose all people with HIV as early as possible after infection.

Treat the infection rapidly and effectively to achieve sustained viral suppression.

Prevent new HIV transmissions by using proven interventions, including pre-exposure prophylaxis (PrEP) and syringe services programs (SSPs).

Respond quickly to potential HIV outbreaks to get needed prevention and treatment services to people who need them.

EHE Indicators

Six EHE indicators:

Incidence

Knowledge of status

Diagnosis

Linkage to HIV medical care

PrEP coverage

Viral suppression

Framing Question

- What key populations do we need to target in order to End the Epidemic?

Framing Question

- How do we engage communities and key populations in service system planning as co-designers?
 - What more can we do to engage communities and key populations?

Framing Question

- How do we use the data that we have available to us (quantitatively and qualitatively) for service system planning and evaluation?
 - What data do you need to plan?
 - What do you want the data to tell you?

Framing Question

- What do you see your role and your agency's role in each of the Pillars?
 - What critical steps need to be taken?
 - How would you operationalize the plans?

Framing Question

- What new strategies, initiatives or interventions could/should be explored?

Reconvene at 12:30 pm!
